DESTRICT REPORTS.

GASZAN

Water capple generally softened. Stoods and Rosettlands reservoirs 1427 and 547 feet days, respectively. Dowing of page-19 and transplanting of sessions may extreme. Stooding copy spec to face. Revealed public supercoan bossympus groupping, surfaces, may and page-197 contrast year for face. Determ prompt seems to journ, forther metallists. Guidfland strifts generally good. Main

Mater-empty reflicient everyt in parts of one tolsal. Stunding strap feir: lest grigolly seriorize in one think. Heretoned generation of givenile, soften your to lest 1 mg and sequences, felt to consult, their, normal, their, normal, their, normal, their, normal, their set follows extremed to their sections. OCDAYARI.

Wasserspijk izsulfdezh in ten tatala and the freisiens. Golarnel 25 feet below the arrival. Forsplan, massering, preparang of mech-beb for piolity, and weeding at progress in parts. Standing cone presently for. Examinated feltoms, maken and profile, relation that approace and existing, full

Waterwegig unaffels it is parts upland. Kittes 2.21 feet below the miket; discharge exflored for general help from the Theopharing of pathy is program in two telebra. Dischling ways pool. Biggreed open and homes, and bengalayan, for it is proved to fire quarter and bengalayan, for its Harreded foliaces and homogenic, activitie poer; citation, poer so nor; means and analysis and a challen, poer to homed; represents, for it is seened; puddy mercual o Pasture investigated, but folder sufficient. Condition of cettle generally good.

DESTUR

Water-eggly conflicted. Desputing of hode for from estimates in program in one director. Standing crops last to fair. Hermandel easign, animal poor; content, sobsets, maj. helganis sub-dition, for. Protess senses easign a time include; fields proceedly selficions cancel in two larges. TURNOUS.

Water-expely issufficient except under the oural and a few tenks. Tempolitation 3-43 fact below the stales. Coving all apply and troughering of second only judge action, forming all professional processing and troughering of second only judge actions, Stanfage crop pearing; fire. Executed exists, mp, longuigness, approve and, blookgram; estimate that the second. Farmer search; fielder staffords. One filter of only prof.

to marks of our tales a fielder sofficient. Coudstion of outline externally pood.

absorbed Contition of cattle good.

Water-eapply sufficient. Studieg crops good. Horsested outcon; cartaca accept. Porters set weightly; buffer enforces. Confident of outla good.

BELLAST. Water-copply jacoffered in partie. Ploughing, pleating of expansion, penering of soil grass and weeking of policy in progress in partie. Planching stups fact to pool. Harrested colons, outland had be normal, orderine, fact to exceed a policy served; registerines, fact to longues. Parties name careful

Water-expely intelligent. Plenghing inprogress. Standing copy lysol. Parture mily fielder

Water-exply inficient names in parts. Wealing of later cosp golds in progress in parts. Guarding strops personally face. Harvaried yaddy, suffices fact to named a orden and easier, poor to fair "Fourier enters, less folder namedate. Confidence of natific good. Establist of the district 14

Water-steply insufficed in parts. Survey of parity, cheluc, raps and indigs and westing and

MARCE 29, 1819.] FORT ST. GEORGE GAZETTE SUPPLEMENT.

Weaveragely insufficient wamps in parts. We fire over the Nellows and dangars established dashed wamped for present regionseries. Froughing for pools, made and solids and series of control and solids in progress in parts. Entiring copy and in this generally pashed withering or without in parts. or properly and prope

CHIROLEPUT

Water-empty installatest enough to a few spring channels and large tasks. Hospitaling to rapit appearing covering of policy and engine sending and transplanting at a 2013, page and \$1.00 policy and the contract of the cont to for ; regs, fair.

Postore exfisient.

SCOTSE ARCOR. Waterengly insulicinal enceptor purp of those toldas. Thenging, executing, eweng and weak-ing of red and growness and transplanting of may gauge on. Standing come parameter face, but withoute or without an parte. Harmon's paidly, any and augments, entering generally face. Tradeus englishes and facility restricts. Confirms of mility personally good.

Watercapply generally self-sink. Employer, sowing, weeking and temphoring of publy and rest peng on. Studing copy generally his, hat set once witnessees without in york. Harmester publy, say and regressed; samon files. Desires weaky as pasts, but dollar seconds. Conditions the studie generally good. Studied of the fathers of 3 and observe the servings of the fast 65 years.

* 887,876 Water-sapply framfferest except in puris. Ploughing, creang of public, regi, circles, and gingelly

We share single from the course to parts. From plant, or want of poolity, resp. deferment springly and chosen said from plant of springly and experience pages as in parts. Benefits on pages rate of the course of CODMBATORA

Water-apply architect emption point of three tobbs. Seeing of galdy and sholms in progress in parts. See-diag cupp generally the, but without an ports of these tables. However, polyle in three bolks; critical across. Partner sufficient emption parts and fedder available. Condition of salidy generally good. TRICKINOPOLY.

Water-empty cultured except in parts. No flow over the Goard Arthut. Sowing at paidly, obstant and groundly gaing an in paids. Standing crops fail. Harvested paidly; common fair. Problem south but tolers of some Condition of south fails. TANJORE

Weter-upply insufficient in parts. We fire over the flowed Auliest and discharge leadings to be presented from Terroriest political and any in parts; contain fair. Product provide efficient and folder available. Qualitate of order possibly good. PUDGE SOTTAL

Water-supply is sufficient, thanks millimities in progress in parts. Standing verys good Harrested polity; suffices him. Posters and finisher sufficient encept in parts. Condition of cattle

Water-supply its referred unsept in profe. Darkneys statusgh the Young land object ON tracts. Foughing and serving of policy, shahet and readly and transplanting of policy gains on Stateling story promptly fair. Burnetely statis, register of these patterns for fair. Texture presently selected and follow trachells. Combine of cooling practing goal. Behald of the dates of 2 dealers. above the energy of the last 35 years.

TENNEVELLY. Water-empty learficient in polits. Ye few over the Brivalkinsker, worlds.* Darkeys similare Water-empty interaction on polite. In flow every the forevergablest section," Electropy's resoluted for precious registeractics. Freeghory, measuring of according to grantless of the first and politic registeractics. Electrophysical varianches enterioring in parts. Hierarchiel youldn't occlude to preside the parts of the first processing to parts. Desired according to parts. Condition of units governing enterior to according to the first terminal. Desired according to parts.

.....

Water-ergyly sufficient. Tourne sufficient rungs in two Links and falls reveals in. Desilions of acting generalize fees. Fainfulled the distinct 10 of under above the average of the last 10 years.

SOUTH CANARA

Water-eggly Westlerest in Juste. Energing and moving of sood held for first rise corp in receiving on juries. Heading one presently from . Zeronich mount not may a sattant fair to conseal. Design search, you find held westless Confering of southing possessify good. Birthill of the distinct is inches above the comagn of the last this year.

Weter-expoly sufficient. Postero sufficient. Condition of entile good.

. COCKER.

Weter-expely interflaint in parts. Oranting steps fair. Tasture and incide interflaint at parts.

Confines a cutle pool.

THE NILOTEEN.

Water-apply reflicies: Finephing, working, practing and picking of role crops continue truthing copy pool. Harmond other makins; output the Tutters estimate. Confine of only

dishifteed union of certain marks.

XVII. Notice to Electric Impactor.

An Act to assend the less relating to the supply and use of electrical energy.

WHEREAS it is expedient to assend the law relating to the supply test can of

PART I
PRODUCTION
PART II
PRODUCTION
Let may be called the Indian Electronity Are.

electrical correct: It is become enacted an follows :-

(2) It extends to the winds of Berlick Indus, inclusive of Brains Bellachetta, and the Santhol Purguess; and (3) It shall come into force on each date as the Governor General in Cornel may, by notification in the General of Julies, threet make behalf.

2. In this Act, expressions defined in the Indian Tolograph Act, 1888, here the necessings assigned to them in that Act, and, unless there is anything evaporate in the subject or cordent;

(a) "astrial line" mount may electric supply-line which is placed above ground and in the open sir : (b) "area of supply" mean the area within which alone a licenset is for the

(8) "area of supply" means the area within which alone a livenze is for the time brang authorized by his livense to supply energy;
(c) "consumer" means any person who is supplied with energy by a livenze,

Expely of energy with the works of a licensee:

(4) "thily non" means a fine for each sky on which an officers it continued
where conviction therefor:

(a) "distribution main" means the portion of any main with which a service

(d) "introducing main" makes as paroun or any main when where a service line is, or is induceded to be, income finably connected:
(f) "clerkric supply-late" scenae a wire, conductor or other means used in conveying, transmitting or destributing energy together with any many continuous convertes these size or insulator auditories, transmitting or man-

ceating, covering, tube, pipe or imminist endoring, surrectaling or say porting the man or may part thereof, or any appearing connected then with fire the purpose of so conveying, transmitting or distributing macorrect.

- (g) "curry" means electrical energy when generated, transmitted, supplied or used for any purpose except the transmission of a pressage:
- (b) "Treaser" unnir any person learned under Part II to supply energy: (i) "train" means any electric supply-line through which courgy is, or is introded to be supplied by a Leaser to the public:
- (f) "prescribed" ments pre-cribed by rules stude under thin Act: (A) "public hasp" ments an electric hasp-wed for the lighting of any street; (f) "service Ecc" ments any electric supply-light through which energy is, or is introduced to be, supplied by a licensee to a container either from a
- detricting unit be immediately from the breaser's premises: (n) "street" includes any use, read, have, squirer, court, alley, passage or open space, whether a thoroughlass or use, over which the public bare a right of vay, and also the readway and below as over any public bridge or Milecular and
- (e) works," includes electric supply-lines and say buildings, reachinery or apparatus required to supply energy and to carry into effect the objects of a license greated under Part II.

SOURCE OF RESIDENCE

77-----

3. (f) The Local Government may, on application made in the prescribed form of materials and on payment of the prescribed fee (if any), great to any present hape nearly in any specified area, and also to by down or place electric supply-lane for the conveyance and transmission of carrier.

- (a) where the energy to be supplied in to be generated sutside such area, from a generating station situated outside such area to the boundary of such
 - area, or (8) where energy is to be conveyed or transmitted from any place in such zero to sure other place therein, across an intervening area not included
- therein, across such acros.

 (2). In respect of every such license and the grant thereof the following provisions shall have effect, namely:—
 - (*) any person applying for a license under this Part shall publish a notice of
 - his application in the prescribed manner and with the prescribed particulars, and the forms shall not be guanted— (i) until all objections received by the Local Government with reference thereto have been considered by it;
 - Provided that no objection shall be so considered unders it is received before the expiration of three meaning from the date of the first publication, of mah sation as aforemits.

Supply by haid-houses

IX. (1) Where, and in so far an, the licensee (hersimalter in this clause referred to as "the bulk derease" is sufferined by her lines to supply course to other horners for distribution by them (herebatter in the clause referred to as "dustributing lisecores". the following provisions shall apply, hamsly :-

(a) any distributing liarness within the bulk-discover's seen of supply may un'te a requestion on the bolk Scomes, requiring this to give a apply time, at which such supply is required, and the date upon which the

empely in to compense, such date being fixed after the date of record of the requisition so as to allow to interval that to reasonable with regard emount of the plant required t

(8) such distributing-licenses shall, if required by the bulk-Rosses so to do, other into a writing agreement to meetre and per for a supply of stongy for a period of not less than secon years of such as amount

tiens bring classgod for such aspply shall not be less than such an amount as will produce a reasonable return to the bulk-limpase on the toy electric supply like then hid down or placed) moured by him is making peurision for such supply ;

(e) the maximum rate per vait of time at which a distributing-littures shall be satisfied to be supplied with smergy shall not arresd what is necessary for the purpose for which the supply is required by birn, and

snce with the foregoing provisions; (4) if any difference or dispute urises under this closes, it shall be determined

(i) the period for which the distributing-licenses is prepared to hind biraself to take correct a

(ii) the amount of energy required and the lower during which the bulk-Herasse is to supply it; (iii) the cspital expenditure incurred or to be incurred by the bull-Newman

in remarkion with the altremad supply of every; and (iv) the extent to which the capital expended or to be expended by the bulk-licensee in connection with such supply may become urproduc-

(#1 Netwithstanding anything in sub-classe (2), the bulk-licenses shall give a surely of overcy to our distributing-lie ness within his area of surgly applying therafor, even although the destributing-herase desires to be supplied with sair a

Provided that the distributing-licenses shall, if so required by the bulk-licenses, soler into on agreement to take such energy upon special terms (including a minimum

annual som to be paid to the helk licenses) to be determined, if necessary, by orbits-(3) The maximum price fixed by a house for spergy supplied to a distribution. licensee shall not apply to any partial supply given under sub-classs (2).

(4) Keery dairbuting-lossess, who is supplied with energy by a bulkhieroree and intern's to discontinue by receive such supply, shall give not less than

Provided that, where the describating-freezes has entered into a written arresment with the helk-licenses to receive and pay for a supply of energy for a certain period, such notice shall be given so so not to expire before the end of that period.

X. In the absence of an agreement to the contrary, the liverage may charge for every supplied by him to any sometime.

(a) by the actual amount of every so supplied; or

(a) by the electrical quantity contained in the supply; or
 (b) by the electrical quantity contained in the supply; or
 (c) by such other method to may be approved by the Local Government;

Provided, flets, that, where the formuse clarges by may method so approved by the Local Generalized, any consumer who objects to that method may, by not less that one method souline in writing, request the licenses to charge his, at the licenses' option, other by the actual manual of energy applied to bins or by the electrical cannifity contrasted in the supply, and therether the licenses shall not except with

his crueial of the remnant, charge has by enother nethed:

Provide, occurily, that, below enouncating to supply congry through any
fairthrouge usins, the foreme shall give action, by guidelined a rank, where the
first through the provided of the provided and the provided and the provided and the provided to change that make the
following reclude, giving out less than one much'd auton in swriting of each obserge

to the provided and the provided and the provided and the provided and the

continued of energy who is required by this from each debricking mate;

Provided, thirdly, that, if the onescens is provided with a meter in pursuance of the pursuance of section 15, and the Lindan Electricity 4st, 1810, and it bushed to the control of the c

XL Save as precided by clause IX, sub-clause (3), the prime sharped by the minest form the maxima fixed by the license, or, in the case of a method of clarge approved by the Local Government, such maxima as the Local Government shall fix us approving the method:

Provided that, I, at any time offer the explanation of seven years from the centremerson of the locates, the Local Government considers or is satisfied that the custom is faired to expose a softward should be about, it may, after such inquiry (if any) are this contract the contract of the foreign contract.

Provided that, that where in order to consume of the forecoint povise locates.

Frontied, also, thet, where we order an pursuance of the foregoing provise has been made, as further order aftering the montions fixed, thereby shall be unade until the expiration of sunther period of free years.

XII. The price to be charged by the Bonnec and to be pain to him far overzy supplied for the public langua, and the mode in which those cases he ways for thought one to be necessariled, shall be settled by agreement between the Bonnec and the Local Government or the local surface, as the case may be, and, whome any difference or cliques whose, the random controlled to the case of the Local Government or the local surface.

Testing and inspersion.

XIII. The formers shall schaline at his own cost and loop in paper contributions to state the number of resing stations, described at each places with manual contribution and contribution of the state of the state

XIV. The licenses shall afford all facilities for imagestion and besting of his works tradels to take, and for the reading, testing and imposition of his incluments, and may, as each consistent of the testing of his works or tracking, turing or imagestion of any instruments, he represented by an agent, whise way be present, but that loot interfere with the mailties, better or traversion.

XV. On the counting of the testing of any works of the literate by an Blockic

the opinion of the Electric Inspector, will least interface with the supply of energy by the licenses, and in such manner so the Electric Inspector may think ft; her, Government, the Miceine Inspector shell not be emitted to have seems in, or materior

with, the warks of the because at any points other than those at which the licensee Provided that the liverace shall not be hold respectible for any interruption or broughesty in the supply of energy which may be occurred by, or required by the

Electric Impecter for the purpose of, any such testing as aforested t Provided, also, that the tacting shall not be made in regard to any posticular

pretion of the works offener than unon in any flerer months, unless in persuases of an Phin

XVI. (1) The licenses shall, after commencing to supply energy, factivith cause a pinx to be made of the area of supply, and shall engage

above or degch below the surface of all his then existing electric supply-lines, street-distributing losses and other works, and she'll onto it dvory year approximate level of all his existing unfor-ground works other than service-liges (2) Every such plus shall be drawn to a scale which shall not be availer than

(5) Every such section shall be drawn to a haringstal scale which shall not be mealler than sixteen inches to the mir and to a rectural scale which shall not be smaller than one inch to eight feet (4) Room plan and section so made or corrected, or a cour thereof, marked

with the date when it was so much or currented, shall be kept by the hreases at his nevertal often or place of husiness within the new of succir, and shall at all responshie tigges be open to the issuestion of all applicants, and eopies thereof shall be supplied on such temes and conditions as may be prescribed by rules under the Indian (a) The lineages shall, if required by an Electric Impactor and where the

Economic is not a local authority, by the local nutbority (if any) accounted, supply free saction duly corrected so as to agree with the original kept at the priorigal office or

Additional solice of certain works.

QUESTIONS AND ANSWERS

The Hou'tle Mr. Kena's Pranar:—

5 (c) Will the Government he pleased to state whether the schurse of
"Village Forests," as embraghisted in the Forest Act, was tried and given up as a
fuller? If so, where and whom?

(i) Will the Government be planted to state also the reasons that led to the shallton of such "Village Furnata" as follows ?

Geneticus and Assesse (Mr. Carles; Mr. Kenna Pillai,

The How'ble Mr. Garden :---

I. (e) In the Chicaleput district around reserves of considerable extent here formation of estacrymery boundaries for the use of the villagers. In both more the useas here been practically decoded of all true to other districts also, but thore has been no time to collect inforgestion regarding them.

(b) The schools of village furnits was not developed further as the fusctions which such forests were intended to fulfil, viz., the supply of legitihave been provided for by the unreserved hads, which, except in so fac on they are protected by roles under section 26 of the Percet Act, see toos to villagers for these purposes. The stroughtion which those upreserved home have authored pourse that the formation of villers forests under the role central of the villacers theresteen

The Hou'ble Mr. Kusawa Prizat:-

II. Has the attention of the Covernment been drawn to an article headed A fewer prisoners " from Kadiri in the Jadim Patriot of the 28th January? Il so, what notion do the Governorest propose to take?

The How'ble Mr. Cardon :-

 Tim Gurentement have present the ertials. The Lineaupprace physicists was placed by the Jungle Conservacy. Department prior to 1872–13 and was formally countituded a reserved forest under the Madras Forest Ast V of 1852 with effect from let Docember 1995. There has been no extension of the tope since that date. The average number of facest offences detected in the general for the last five years has been three tracks through it, it cannot be considered a barrier to communication.

The Hop'ble Mr. Knorta Phase :-

III (a) Will the Ourocassed be pleased to mate whether it is not a fact that a District Forest Officer determines the compounding for in slightly grating (b) If us, does be compound the offence of traspus only, or treature and

damage committed? (c) If decaye counsitted weight with the District Forest Office in determining the compensing for on each head of the sprease of narreals recognised, will the Government be pleased to state whether the Forest securivance report solutified

(d) If there is a heading in the Perest offence Form A to show the damage doze, will the Operational be planted to defaut the manner in which exquiry about

The Harible Mr. Carden:-

III. (a) The number of entile encourses as in Supertrat Sector in determining the compounding fee in mass of illight genoup, but other (Mr. Greice : Mr. Emms Pillei.)

(8) The offerre compounded is that pursuable moder section 21 (d) of the Forest Act, vis., necturing cattle or permitting there to trespan.

(c) It is not generally possible to estimate the disrange done by Olicie grazing. Its nature and extent, so far as they can be specified, about in shore in column to of the definer record and if the daman is of the

extensive the fact should be externi there.

(d) The Government see of opinion that no stereotyped from of exquiry could usefully be prescribed. The question of insuing further instructions with reference to the recognosiding of forest ofference to

. under their enselferation.
The Hon'ble Mr. Kusava Pittast :---

IV. (a) Is it a fact that the village Tinance-oblavi in the talok of Mangalore, South Centra, has seffered from the crossess of the floods in the Gurupum inthatory of the Naturalis river?

(4) Is it a fact that proposely were under consideration to construct of dam to direct the opens of the dools to use the hads under outlination but were

dropped subsequently?

(a) Is it a fact that some of the villagers had to sheadon the village in consequence of the drange down by the creation to their fields?

(d) Will the Government be pleased to make empurise if the village and is cultivating fields could be seved at a runsweable cost?
The Hea'de Mr. Gorden:—

IV. (e) The village of Thennearblazzi has suffered from arosion owing to floods but not to any appreciable extent during resect years. The note washed away during the last seven years has been 3.

erret t3 étents outy.

(8) No sorts proposals have ever been submitted to Government.

(9) Enquiries which have been made in the villages show that the village.

officers are not so are that any villagers have left the village owing to the damage done to their fields by recess.

(d) The Government do not comider that any action on their part is all

present called for.

The Houble Mr. Kgnara Filled :-

V. (a) Will the Government be plaused to said if they have received the ordings of the first confirmate of the Puttir Landholders' Association, Such as Abrief hold in Manch 2000 0.

(i) If so, will the Government be pleased to sinte if their attention has been drawn to a shaperest numbric the edderses of selection on firest grievances, sod, also, to the resolution No. 2 of the secretation on the same subject?

(c) Will the Government be pleased to state what action they have taken ar perpose to take in the motion?

The Haville Mr. Corden ;-

And, I believe, the Eurepus Bonel will report that there in accounts for a farther continuouses of this concession. The total amount which the Government event in the near 1905-1909 as will be seen from yage 6 " of the

Amended Dreft Financial Statement on this grant of encapensation for deurose of find-graint to this place of Gavernment accepts to Et. 17-22 hale. Though the amongle which the individual members are receiving are comparatively small, we find that the total figure comes to a very large figure which, on I said, in 1966-1966

Berled Financial Stateme

(Mr. Arnitaea Nayer; Mr. Seelagiri Aipar) Mr. Atliaco.)

came to 1) likhe and odd. In the current year, according to the revised web-nexts the figure comes to very nooely 10 likbs, the exact figure being 1-55 likbs. Accordif the Council corner this revolution, it will come to this, that there will be a recoving charge of about 10 lakhs in round numbers added to the total expenditure of the presidence every year. The question is whether, if this resolution be carried. to do that. Except in one or two instances, for the hat many years, the revenues of this presidency have been increasing stendily. In 1998-1994 the opening balance was 40 71 lokks; the spening balance in the next year 1994-1905 was 85 12 lokks In 1905-1906 it use \$1:10 laklus; in 1906-1907, it was \$8:00 laklus; in 1907-1909 it was 100-27 lakin; and in 1906-1909 about here was a slight full, it was \$9.57 lakin; and for the next year according to the budget estimate it is 13./18. So that your Excellency will be pleased to see that summily there is a large surplus at the disposal of Government. I think it is not necessary that the Government No doubt undocessen contingention may arise and the Government start be presured to meet these contragancies. But even making a liberal margin for unformers, large balance at the disposal of the Government. If this resolution winch I new move be accepted by the Caunoil, the Council will by a large number of medal, hard worked, deserving and poor people under a deep obligation of gratifale: and if, altimitely, your Excellence's Government be played to record the record mendation contained in this resolution, then the Government will also have these people under a similar datt of obligation and gratitude to them. I believe, your The Hon'ble Mr. Smeanner Arran :- "I have been asked to second this

conclusion and follow of the places. My referrit remains at the Term I being the design of the Conference of the Confere

The Hon'bio Mr. Kumurax Naras :- " That is not my menting and probably I

did not clearly expects my menning."

Berisel Financial Statement

(Mr. Atkinam; Mr. Erislaus Kruer.)

The Hou'ble Mr. Aracmaer: -- Probably you did not mean it, but if your propose grain comprission on that pur, neless the Houble Mr Krishann Nayar will cal concession which he response. Hit is a more time of rinking the pay of the flowerance; terements, surely, it will be inequalable to exclude, on account of a purely temperary metter, a panely foriatious circumstance, screams in those half depen districts that prices of feal-grains. The Humble Mr. Krishman Negar is right in anying that in that. What renormable ground can be shown for such extraordinary differences of columning may differ by two likhs or more from year to year. I wish to know

The Hen'tle Mr. Krishran Naran:- " Apparently I added,"

The Hon'lde Mr. Arranton: -- " I use glad it is not a certain statement. When we are described the question of raising the pay of the Government servants, the assumption is that the high range of prices will appearably stay. Will the some termption held good if we are discussing the quarter of russing the Government so-respect on Pystuari land? There was a meeting of the Tanjare District Associstorn at Kumbeltonum last Neumber, at which a friend of mine perceded and that were far too high and that the Government justified them or excused them or the ground of high prices. He said, 'it is true that for the last two or three your the syst is able to pay the Government assessment without the usual difficulty. This is because of the high prices of genia." It is impossible, be noted, 'that the high rate can be kept up for long." Then he went on to say: — But the effects pretuned by these high prices, namely, the insects in wages for the labourer will remain for ever. Already there is a big fall in the prices of grants?. When it was a question of the permanence of the rate of someoment, it was found that of Government acresses should be resent the augument is that the propes will apparently not fail. In this quelation which I have just read from the speech of the President of the Tanjare District Conference, there is a residence which, I thulk, the Henoughle Manhers may, with much effect, take to heart. The effects preduced by these high prices, namely, increase in sugas for the labourers will There is another consideration, and that is whether we fall to eithest eardificies to Government service. On that point there is no doubt. Up to the present time,

Brainel Einsmel Statement Offer Atleans ; the President; Mr. Kenny Pillel. !

there has been to hole of candidates. The present rates of pay and camply rafficient We have more yet experienced any trustile in recruiting for the rations offices made the ended of Government. Reserving to the other consideration as to the workst rate, if it he hold that the Government should pay a higher rate for their secretar grades of sevents and not only in regard to sevents but also in regard to all comspolitize? I amount that the Government of India will not agree to the preposition that Garranment should pay higher prices than other purchasers. As a matter of our year will all probably he glad to know that the fifteen report generals is reportly variables. Already the minimum rate of pay has been mined from Ra. 15 to 84 30 in the Stamp and Stationery effices, Madres Calincter's office, in the Court of Small sections, in the Bonok of Evenue, the District and Suberdinale courts. Further, it in proposed in the instruction factors to runs the solutions rate from Ea. 15 to Ea. 20 in Police offices, in Municipal sourts, for cuttle pound clocks in trisk offices, in Ferent offices (in the range clevical staff), for Loral and Special Fund Audit shorts. in tales offices including the offices of Deputy Trivillate and Stationary Sub-Magistrates and the office of the Registrar of Fiction and Dorthe. There are proposis which we hope will be caused est. But carinis details will have naturally to be considered. Earling in view these echancements of pay, I do not see how this Council can held that the Gosermanual large been otherwise then liberal. it abould be beene in usual that the allowances, as I said shearly, see granted for is not forward. It will not bear extranction; it is alogned. And forther, what is much more important I would not Hemorrible Members to recreater that their duty is fest to the general body of two payers not to any preticular broach of the there is no principle, no correct principle upon which this suppletion is board and having regard to the principle of economy in the administration of public funds, I

Has Excellency the Passenser :— "The Council will now adjusce till 3–25 $z.z.^{\prime\prime}$ On the restreething of the Council, the discussor up the Honble Mr. Evishan Navar's retolution was resugsed.

The Horble Mr. Kissava Printer:- " We see all inxines that there should be sympothetic. The message gaves by the Honograble France Member with all has averactly would not give a hope of obear to the paor man to the made and. But, at the given to slight drowing a solary of Ex. 15 and I wish that this combation had been increase of pay. Hen employed in the higher services of the Police, the Expire, the popule in the maximal and forms are not to get my. Why should not they get some mirrors of pay? The descript of food is acknowledged and I believe that the Government are enhancing their assessment in various districts on the ground that

(Mr. Kessov Pillal ; Mr. Perroja Poutals ; Danus Bisheder Grainda Suplana Aiyar,) the syste are realising more money by selling grains at higher rates. The Governor ment are levying more necessment on that ground and this increased assumment will people who are willing to accept service as the market is glotted; but the quality of work done by them will not be high if they happen to be low-paid. But, shows all, dorectment sermats should be contented. In regard to private rerunts, they have their own perquisites which the Guovenment nervice does not afford. I would resolution is worked and I cannot schoethe to all that has been said there, the mercials and the clerks that ecceive small salaries below 16 rupos deserve sympathetic

consideration. I make these remarks, so that the Government may, in francise their future budgets, give higher pay to those low-peid but deserving servants." The Hor/ble Mr. PRINADE PARTIES: - May it please your Excellency, it will no

increase of salary to those employed in the clement and mental services. It must be the rouditions then prevating. But, in these days when sugges for manual inbony have rices, it is natural to expect that the wages for clerical labour about have extrementingly rises. No doubt, as the Escrible Mr. Athleses said, the rearket is plentiful and the Garenment have not been handicapped in finding candiyelding to any temptations. It is hearly possible for many of these people to live on of Parance ought to be carrful about country and all Honourable Members should their relatives whenever they find it convenient to do set. No could there may be but all there difficulties can be got error, of the pay of these people were introduced in place, where allowance is now granted for descreen of food, till next year, when areaconoment abould be made or not."

The Hon'ble Down Enhancer Gorman Ranners Askan :- I beg to econor the resolution that has been moved by the Box blo Mr. Erichete Nayar. Perhaps I shall all requirements in this connection and that there was method of arborationly meeting may increase in prices, which the rules indicate and these rules having has the newton of the Government of India could not be easily touched by this Government and that the revelation will therefore inhear ander they great dampleansay that in critain events grain congeniation allowers may be given to corbin

Bernel Finnesyl Statement,

(Dinez Beloder Gooleds Explans Signs)

acceptate whose archrice acc referred to in the ruins; but your Expellency will Governments and Afterwaterations which coght to work them, and that there is no obligation respond upon these Opveraments or Admirestrations to gare effect to these Governments and Administrations may great compensation allowance; and is the other compensation allowance and that the Lord Bornamunta way at their described will observe that there is a large amount of latitude given to Local Borgermanis. I see lution does aim at doing sometime which connot be said to be the case as the relesion to your Excellency, that so far as those districts are concerned, if the Government have Government felt that the sometimes under which it could be given have not wet began that that arranged transit be regarded as sufficient in record to a resolution which has compensation is given and it should be shown why in those districts green exapensylion ellerance could not be mole personent. It has been said that it expect be stated that the rise in prices on which slope this great of consequation has been considered measurer, will continue. The Honourable Member in charge of this particular head has also read to us certain extracts from speeches unde elsewhere to will cheave that the Deaft Francial Statement which has been given to us does go ing of grain ottaperation ellowater. I take it, your Recollege, that is francing that no recrision has been unde for meeting figure relief. I take it that the newcary to provide for Be. 947 lakks solely to around of grain convergation allowance, and if that is rendered severally not needly by what is approbabled as to countions relation to appearant. Your Eurolieany will observe that, so for as the occupration allowance. But the position is different when we come to consider might be poor so that the not income that a landlerd might have well be small outwithdrawling the rise in prices. The value of bitter has increated and that will cat about his meson; the cast of life has mercaed and that shows that he careed which has not resulted in cohsuccase of convenent. It appears to use, therefore and that being so it was saked why should the Government act differently? In the man of otlyate owners, the question whether the cirrle is well or ill-pand is a seather between the complete and the employee; but so far as the Government is occorned, (Denn Babular Guinda Espènia Aigor; Sir William Mager.)
It is to the interiors of the tax-paper whose interests are safeguarised by Government

t'me the work of the tigrersment should be enrich on efficiently and with the least friction between its servents and the Government and that is possible only if its private custleyer. Again, your Excellency will observe that this argument, if driven to its legical conclusion, might land us in this aroundy, there are few private paragragives prosted to its servants and it shows how differently the Government account stand from private services. It is not therefore proper for me to apply to Government servants the same tests which a private rappleyer may apply to his own servants. They It has been said that there is no peoplity of services even on enlarge new offered and cost of sennacement which will he the result of adopting this resolution. That appear ment looks no doubt very plausible, but there is another conscioustion to be kept in wages for a large body of severats but it should see that the wages are fair. I take that an increase in the pay of its sevents by way of grain compensation plays. ance is not an unreasonable one. Under these currounstances, it appears to me, your Excellency, that the result from it will worthy of the support and acceptance of Gorges. is felt that refers that now cittien are not littely to go down and if one rould store fit thing at all, in future the prices will go higher than at present, the allowance may be made permanent. I think that the resolution which merely size at making the present allowages permanent may well be accepted by Government. It to said ters drawn, it might follow that there will be a fauther addition to the way of everpenetion in Salure years. I submit, year Encelbooy, as far as I understand it, that the resolution does not appear to bear this messaing. The Encoundle mover himself has said that it is not his not in moving this resolution. It may be clearly stated that this additional pay is given on occurant of compensation allowance, so that it will be perfectly clear that the application of the rule will not be rendered say legger necessary. In these erroumstances, I scalare to think, your Excellency, that the recolation to one which is perfectly renascable and I therefore beg to support it."

The Hou'ble Sir William Martin : - " Your Excellency, I should like to reply to is the Bodget figure. He says that the Government, on fixing the Budget figure for next year of Co. 9-67 lekins, have shown their belief that the rise in points has come to stay. The Hudget Squee was fixed largely on my advant, and tool was not my isies at all. What I did say was that hat you the Government had been a good dos to suggest; in 1909-1919 they obtained for an approximate expenditure of ought to hadget as if the present rice is price was to be permanent. But it does not follow that, in providing for the worst, they necessarily anticipate at. Then there is and the mover did not imply that the persons whose pay is to be increased should renates tent the elects will have their pay increased, whereas this addition that they now get as grain compansation allowance is what is called a local allowance. Any increase of pay is parmanent; it counts for leave and penson allowances, so that there is evertual expense to the State over and above the grain recoperation allowofferwise jurified. Turn you have to requesible the fact that this increase is confined to certain districts in which the process new at present high. But suppose the closes here get their mercans, in a year or two the prices may go down in those districts, and they may become high stemewhere the -- in Karmool perhaps. Then these obvious will get their increase of pay and you will have to give grain compensation in districts where the pay has not been increased, so that a few years hence the origin of this

Resired Flouresial Statement

(Sir William Meyer,)

increase in consequence of grain compensation allowance being commuted into our will have been forgetten and the man now benefited will again o'nim gmin compresation. The Henousehlle Member has referred to sechange compensation on a case road. When the Eccopera officers of Government got exchange compromise allowance, it did not take the form of a percented increase of select, which was storged in their pay. The cashange compensation was fixed on a stoffice stale which depended upon the difference between the setual value of the raper and us ideal the cam of settlement. That is to my, if the Government have to incur permison charges because food-grains bepon to be done, whether the Covernment are contilled to they may have a large family or pay sevents more wages. But L beg to point out vation. If the principle of this motion be mispired, they will certainly be autiful to prices into consideration. But, of crueso, they do not do so, but they take only the averages, years in which the prices are abnormally high, the years of femine, being left out of consideration. My chief objection to the resolution is that if at what I may call, with all respect to the Hansscrible maver, wild not factor. There is a vermaterial difference between temperary and percentaged expenditure. We see you disappear or, I hope, he reduced in time. What do the Hautership Meraher and those who think with him propose? They propose to provide a lamp increase of the last two or three years our income has increased by about 15 lakts a year, and two-thirds of this increase is proposed to be mortgaged on, what I am bound to call unselectific principles. You take hapkened results of the present-day prices, and an The conditions now proposed had been created out in the year 1908-1900, we should now be previous -carried out, requires the sanction of the Government of India and the Secretary of State, because any increase to persencent solary which is store than Ex 25.000 s Year requires the expense of suffernity question to that of the Local Garagnager process to spend 95 links: it is true that we did not extend to an any amonthing and these of the electes and peace of other districts, we have not considered whether make normanent, by this resolution, what we pay in a single year. Been the Council of India would be that the Mades Government have more more than they can profitably speed and they would my ' let us consider whether the terms of the financial the surplers. There is a must important Prices Impriry, instated by the Government of India. They have not un efficer on second duty to mesure mio a squely of for they are Eksly to be personned to farme be can justys. Would it be sensible on the part of the Government of Madres to do saything before the result of that enquiry is known? My Hop'tale frame Mr. Kesawa Pillio has maken sympathetically

Secretary of State and the Government of India will may " No, we will not allow that ". Always it is the other way, on these and other things are left to the discretion of the coal Coveragent. Lestly, the Houble Sir William Meyer has stated that of than Past speke on this revolution some had token into econodistation the fact that an expert had been appointed by the Government of India to investigate into the causes of the premiting high prices. Even when I framed this resolution and moved it, I had to it. The expert may find out or may not find out the true causes of the prevention out the agase will not record the existing still. Again, with due respect to the Hou'ble Sir William Meyer, I beg to submit that it is not recessary to take inte consideration the fact that an expert has been appointed. With reference to the other points, thesi by the Eucocubic Mouber in charge of Famute, huwers have know the fare of this resolution already—I am glad that a describion has been started. I am glad slot that the Houble Mr. Attaceou, the Hember in charge of Finance, has expressed has entire sympathy with the suggestion contained in this

resolution. We and the clerks concerned are thrukful to him for the sympathy expressed by him, and I am some that if not in this year, at least in the next year or in the impediate future, the Hooverstie Member will find his way to induce himself and his colleagues to carry out the principles contained in this resolution.

The produting was put and negatived. The Eco'hle Mr. Krezewan Navan baring called for a division, votes were

With that here I place this resolution for the counteration of His Excellency and recorded with the recalt that eight world for the peculation and thirty against it The Rea'ble Mr. Armonan: - The next group of beeds in the Financial Statement which I have to introduce, is the expenditure head in Statem and the expenditure head under Assessed Taxes. On neither of these have I say rouncks

"The next group is Ensise, both receipts and expenditure. Today this head, in recard to receipts there are one or two remarks which I think may prove interesting.

I know that Bosonrable Members are always interested in the subject of the movemption of country spirits. It will, therefore, be interesting to them to hear that in the efficial year 1909-1910, 1,021 eresck shaps were closed and furthermore, the essupption during the current year up to date shows a decreear of associative like 155,060 gallons. That most no doubt he wary gratifying to Hogostable Members. In regard to toddy revenue, there has also been a large obscure of shape up to date we have no statistics or figures to tell no that. We would have been able to infer countbing, if there were any figures annibble with regard to the number of trees tagned; but voder that head I have no statistics to give to the Council. In connection with the brad, I have to refer to a matter which was nectioned in the Firence Committee. The Hon'ble Mr. K. Persaya Pentulu, at the meeting of the Finance Committee, made a suggression that liquer slieps should be located, as many counties and there are varying views on the subject. Seese people hold that public places so that these who neght not to go and drink and those who are descrifted thereby would be restaured from going there by the four of publicity. But the Hou'tle Mr. Permis Pastabr's view in that, if the shap is put round the the Government do not propose to take any action up the matter.

"There is mother matter to which the Hop'ide Mr. Permja Pantulu referred On the subject of local option I thresk he has given notice of a resolution; and I pronet refer therefore to that subject now, because that resolution will come on for

(Mr. Albinon; Mr. Percaja Puntsis; ile President.)

Assertion after the budget discussion. These are all the remarks that I have to make on the subject of receipts ander the head of Excise. Under the head of Expanditure the figures of which will be found un page 50 of the Civil Bodget estimates, I have no remarks to make at all."

The Morble Mr. Persons Payment - "Your Extellence, it is rather onfeeturate that the drink bill of this presidency has been mounting very high. In His Excellency the Pazzaness (laterwaying):- "The Economible Member is not in order in cutaring into a discussion of the subject. If he wants to have so

is not un occasion when I can nilow a discussion upon a question of policy." Tan Hoo'ble Mr. Pressant Payerto: - "That I will discuss on the 5th April But what I beg the Government to empider is whether the Government will not see its new to relace the amount of the bedget under this band, as the Her'ble Mr.

corresponding increase in revenue. The question is whether the Government will your Ascellator has present out, the proper case of their in macen at is when the proped statement is placed before in on the Sch of April. We are not in a position . new to suggest any deficits resolution bearing on particular items." The Han'ble Mr. Approxes :-- "That being so, I past on in the consideration of the next group excely Ference No. IX, Secrepts on page 10 and No. 11,

Expenditure on pages 52 to 57 of the Chief Studget estimates. In regard to sevenae, Expression on page of the manners to make except to make a reference to certain western discussed in the France Committee Under the head of Expenditure again. I will only draw attention to a small item as an indication of the boosystest intentions togrammation of the Range cherical staff and the other for the introduction of the time scale of pay. I refer to them as smother industries, out of many, of the benevaluat intentions of the Government Then I will pass on to a reference which I will enhance to make se told so possible to the several subjects mentioned in the Figuree Committee. The first of those relates to a suggesting made by the Boo'ble Mr. Kennes Pillat who, I know, is very much interested in freets—that the existent apples and wood apples in unmorread lands. The point mixed appeared so expects appear now whom appear to represent solds. The point makes appeared a should that it was thought that the Garagement could say at once whether they Member has been talk of it, but the fact in fact in the ores of unreserved, lards to fee is larned for taking firenced, so that the book that he seeks in already in nisco and the emplasion to which for Covenment have come to that great within pristone. As a matter of fact when the secession of the pryot or the benefit of the process removed are anothering as from a policy, one coming as given is and the and it is rather ourious that the Honbie Mr. Kenne Piller yes, I think, gravere that in the case of Anantapur, Cablepub and North Arest theirest at the present

time, in all the reserves free cutting of grass is allowed."

(Mr. Kenna Piller; Mr. Atliana; Dieses Behefer Guinds Raghors diver.) The Horbie Mr. Kusara Pintar:-" I know that periodical permits are given

The Heaville Mr. Armonas : - "The information that I have is that free culting

The Houble Mr. Krawa Pittar: - " I wish that information is correct." The Hon'ble Mr. Atknows :- "That is my information. I may be wrong It is possible that the cilingers do not knew that the privilege is allowed but the

fact remains and I am informed by the Henourable Nember of the Board of Revenue in charge of Forests that free cutting is allowed not only throughout all the reserves in the districts that I marged, but also in some measures in others, namely, in Bellary, Veragrapatan and Kurnool."

The Healble Mr. Kasava Pittas :-" Is it at all times?"

The Hon'ble Mr. Atmosm: --" Yes. There is no limitation. I may be wrong, I should be gliad to be told if I was wrong." The Hea'ble Mr. Kranya Praner: - "I should be glad if you are right."

The Realist Mr. Armson:-"I by no skin to intalibility and the memble Member can put me right if I am wrong. Another point mixed was by the Ron'ble Mr. Govinda Registra Alvar that presents for grazing cattle should not be confined to one perfeculty block, but abould give the option of grazing in any block armiable in the neighbourhood. Regreting that matter a communication has been says to the Heconomical Member, but I may explain that the Escatation of graphs to one block is improved, in much in the interests of the builders of the permits as in those of the Government. If the number of percents sensed for any given reserve is limited, if meters limitation of the Government revenue. It would be more to the interest of to instation to eatth owners driving their natile anywhere and everywhere. But it is abricos that the amount of gross evaluable to any given reserve is limited; it can afford pesturage only for a ordern number of outtle and therefore in the interests admitted to any reserve. That being so, it follows necessarily that one peculit

cannot be used for admitting cattle into muce they one area. of The next cabject was a suggestion under by the Hen'ble Mr. Keesen Pills for selv kindly tell us what is proper confess, we might be able to do constitue, as that is the difficulty in our way. We should be glad if village forests could be formed under proper control. The matter has been very carefully examined lately and it is still under consideration. Experiments have been tried of having what are called

village forests and the results bute always been the same-that lose growth is totally decrated and all the trees in the area, formed into a willings receive, are some or later-generally comer than later-enterty closered of. If the Hearth Mr. Konava Piles or any other gentlemen can fell us how to central the utilization of these reserves, we shall be glad to oppoider the mailter." The Hon'ble Mr. Ketava Pozzal :- "They have a system in Mysons and I would rader to the scheme electohed in the report of Ser Diefrich Brandis.

The Hon'ble Mr. Armyrox :- "Will you kindly tell us what it is ? " The Has/ble Mr. Krawa Pinnat:-" It may be found in the report issued by

The Hee'de Mr. Aranges .- The next is a suggestion by the Hea'ble Hr. Gavinda Raghava Aight that the Goom amount Forest depotationald be used for the

sale of charcoal and that coal should be stacked and sold to ryote at rost price. Enquiry has been made into the matter and the result has been recently published. The result is that the Gavernment and possibly the Han'ble Mr. Govinda England The Hog'tle Divers Babular Operata Rapasara Attan:--- I suggested that

end may be tried as an experiment." The Hou'ble Mr. Arranger:-"Coal we cannot try. Chercoal is tried in 57. depots and the system is autended.

The Han'ble Mr. S. E. SHAMMURAN PRIMAL DISCUSSION OF THE REVISED FINANCIAL STATSMENT FOR 1910-1911.

The discussion of the Bevised Firstorial Statement was resurred. His Recolleger the Passoner; -- "The only stem, goatlesses, which was not brought under review on Saturday was the Public Works Budget which we deliberately purposed for consideration to-day. I solt the flow bis Mr. M. Hannick to be good enough just to my a few words in organi to the arrangement of the Budget."

Regiond Financial Statement (Mr. Hannel) The Houble Mr. Harmon: -"Your Roselleney, the Poblic Works Budget in

previous meetings of the Council in previous years has generally been taken on bloo. ever been taken of the details in the Budget. I do not peopose to keep the Council for any length of tirm to-day. I may as well under each head just briefly explain

"The first item is No. 42. Irrigation-Major Works. You will see that the budget estimate for the coming year is a total of Sketil lakla, of which the Provinces share is only half, vir., St. 10:24 lakhs. The total working expresses are its, 22:54 hiths. The other large item in "interest on debt. In 29-11 laichs.". I think all the ture under Irrigation-Major Works for 1910-1911 " in their hands. On page 2 of that budget, you will see the European brade given of Productive Works - Direct collections in the Ecocuse department, its 2-25 labba," which commists of different disses of receipts. These see the direct collection from order rates. Under the Kurracol-Cuddepth Canel, I may say that it is under consideration between the Public Works department and the Board of Revenue whether, under the oppoundances in which the casal is worked now, it would not be letter to bring these receipts under Project and Pennie River carnie system are the direct relications of the Public consisting of reats from trees rents for letting out water for purposes other than irrigation and other small from of that sort. I need not detain you langer on that On the other ride of the budget, you find Irrigation-Major Works (portion of Land Become due to Irrantion). These are the regular receipts from irrapation which are veriet out on a system ordered, and originally designed by the Government of India and which is always applied to our strigation budget. It requires no explanation from me. It works out to total receipts due to irrigation of Rs. 98-11 lakks.

"Coming to the head of charges, these union works do not demand deach explanation as they are all concerned with the Imperial Government. The headings are are plain enough to the Council and they do not need any explanation from se the whole establishment which is charged to the work, That, I think, is sufficient

explication for the Major works.

"Then forming to the next which is " Miner Works and Navigation", the Honourable Members will see that on page 2 of the budget estimate for Minor Works, there is a total there given of receipts; 1-80 lakes. The only items which I need notice on that page are Madras water-supply and infigation extension, Ropers other is Buckingtom Canel, Sa. 10,000, which are the receipts which come from the lary of fees on boots and so on All the other items are small, varying from Rs. 500 to Rs. 2,600 and they are, I imagine, chiefly receipts from sale of trees on the "Coming to charges, Hopological Manahord will not that on pages 8 and 4 the

charges are given in gross sad a reference in made to each page in which explanation will be round for the charges entered on pages 5 and 4. They are all observes for keeping up werks under the different systems and the only point that I would notice spent on what is called the Teak Resignation believe, I may say that originally the Irrication Communica, whose report is no doubt in the hands of some of the there' was correspondence between this Government and the Imperial Government whether we could possible work up to that amount. We asked the Government of

(Mr Simurtana Pillia :

The Houble Mr. SHANDLOAM PRIMS then moved the following resolution :-"" It is must recoverfully recommended that the provinces of \$55 lakks against "Ciril Officers" under "43, Minor Works and Navigoton" in the Amended Braft

Financial Statescent, page 57, for means to tanks tooting not more than Es. 2.500 during 1910-1911 may, if possible, he ignered by one lakh of rupon, the provision mode against "Works in charge of the Public Works Department" under the same myler head 45 being reduced by that empera." In moving this resolution, the Health's Mr. Sausucuar Prizar said :- "Your

Excellency, the total estimated receipts for 1946-1911 amount to 1,207 likks, to which the Land Kercuse convitates 560 lakhs, or 54 per cent. Of this, a country, able portion, not less than 50 per cent, represents the charge an wel, the most important of the items constituting Lord Resease, the fell realization of which

"The whole of this arm is dependent for irrigation on two classes of Irrigation Works, vig. 42. Kajor Works and 45. Minor Works and Navigation. The lattertion of the povince than the Major Works. The Leignilion Commission in their roort say: There are no less than \$0,000 small irrigation works in the Presidegey, consisting either of small tanks or either changeds which invients between from over three million seres or about as much as all the works in the first class pet together. 40 these, 3,400 of the larger works irrigating over 200 same each ers in charge of the Public Works Department and 51,570 works are in charge of the Erresso Department, the rest consisting of very small tanks irrigating less than 10 acces, and of spring and river channels belog knot up by the renty thruselves. The areas treigated by the weeks under the Public Works and Herence Departments during the three years ending 1908-1931 are 3.117,263 moves incurred by Government during the same period in the assistanance and improvement of the works amounted to nearly 20 lishba, or 25 per cont. of the revenue realized. the opinion of most of the level officers both in the Revenue and Public Works Deportments that the grants hitherto allotted are insufficient for the purpose." Then mend that the work of teak restoration should be vigorously proceeded and that the espects to be fully recognised by the Recupic and Public Works officers. The defective supply and that a very large part of these remainings was occupitated by the that an amount of expenditure on the works of ant less than 25 lakes which to less

"Thus, it would appear that besides the river and spring channels, there are 50,940 backs in the periodency. Leaving out of second these irregating over 2000 serve to charge of the Beyone Department counts be less than 20,020, if not more. I know there are true than 2,500 hasks as South Areas. In some districts the number may be

moray is a different way from that in which they have to account for it when they a certain amount on works which are in charge of the Tabubbay, which is exect at like Re. 70,000 and odd are speat in that way, so that the whole sensent spent so those small works really somes to eight lakes instead of six and a half laken as is sustered here. As I may, the only reason for not increasing this allotreed is that we are afraid that we shall give the Tehnidees more than they one apoul. We are now in the month of March. Expensed Odiesters will tell you, as they have told me that have to spend in December, there is very little chases of mending your full amount in the next year. You must begin your work at least three mouths before the year beging. If you are going to opend somey carefully, I think Howarehie Hembers will one lakb. But the Bortmount are, however, quite rendy to make a larger of ourse In charge of Public Works Officers, and give it to this goast for Civil Officers which will being the allet next from \$50 lakes to 7 lakes. That is, what the Tobeldays tried to spend but year. We shall see at the end of the year whother they have been able to spend it. If they are able to spend their grapt, next year we shall give them more. It is nowise to give them more than seven lakin. I wish Ecocarable Members to understand that it is merely a matter of transfer from one head of works to another. It is merely a question na to which agency can spend. It is not a question of withdreasing any money from Irrigation. not arise. The only other rount that I made a note of in the suggestion made by the Honourable mover who, as Trimitive hissoid, should know about it that you can possibly devote one more perfushly to minor tanks in the matter of cleaning silt. I know, as the Health Mr Afkiness renombers, that in the worst of funior times, when it was suggested that so a famine work, we should rat name to the election of till, we were told by the Public Works Reportment offers way of salt, will out you there's or facts there the value of the mater that you will not not the hole you have nedl: It is not easy to clear out silt by sucly labour. It are rather sucretical that the How'ble Mg. Shanesugues Pillial suggests at as a senses of spending time lakhs. That shows that we want scientific people to deal with those

PART II

Memorandum by the Honourable Pinance Member explaining the general financial position of the Presidency.

Accounts, 1908-1909. • 1

1. A complete review of the transactions of the year has already been published in the Accountant-General's used the Exerciser's appropriation reports, recorded in the proceedings of Government, No. 53, Francisi, dated the 7th February 1916, which have been placed on the Editor' Table.

2. During the year list transactions of district and other local founds formatly called "incorporate" in lead franks are enabled from the public account; and those mode the debt lock "Repoint of Local Plants". The leaft 2 Adjusting Hashis which the debt lock "Repoint of Local Plants". The leaft 2 Adjusting Hashis which the transactions between procuratio finals and "incorporated" final fluid were recorded was shellfuled and the transactions between the two funds were shored under the returns and service locals concerned.

2. The Provincial cettleagest was revised with effect from the beginning of the year. The mean changes effected are stated in puragraph 21 of Part III.
1. The extent transactions of the year compared as follows with the budget and the revised estimates:—

		_		militaria.	organic.	Artsals.
Opening belance	**			90.76	29-62	90-65
Espendium			-:	551-68 552-68	579-55 584-84	560 15 562 93
Surplus				19.50	14-63	29-25
Citring balance			[117 96	214:00	150-07

The artial opining balance of the year exceeded the figure adopted in the bodget by 2-00; there was an improvement of 10-07 in secripis and an excess of 10-02 in expenditure; the estimated singles was these mixed by 10-05; and the decking balance

(Rayland Estimate, 1909, 1919

5. The following statements compare the revised estimate for 1909-1910 with the budget for the same year:---

		Rec	nysk.

In the trapical Draft Flavorial Substants the Intal Provincial expensity or was commonly at 189790. It is now put down at 186803 with reference, as expensive the foreign tempts and the further effortments one before at The most badget flavor under Parise where the expenditure is waking narro closely the badget flavor to the province of the province of the province of the province of the Boosan works for a carrows in the tabeling grant-mass when the Subject Boosan works for a carrows in the tabeling grant-mass when the Subject That project has required been transferred from the Productive (Imperial) to the

17-19

Minor (Pravincial) works class. On the ather hand there has been a decrease under Cress Worss—Fresco Works Directory where it is now authopated that there

Creat Works—Create Weats Directions when it is now antispated that there will be a considerable layer as compared with the budget poersion.

The principal excesses over the budget great (Provincial) occur under the bedget

6. The budget estimate for 1949-1840 provides carriers or an occurs of nearest of the great of compression for decrease of precisions while the revised estimate, includes provides for the whole year. The extra expenditure is 4-35, and this face accounts for a portion of the extracts were the budget grants.
7. Other important contributory onesse are noticed below:—

 Laso Revenue—Enhanced expenditure is in consequence of the grout of daily allowance to Depair Thinking and Sub-Magnituries, of travelling allowance to the temporary antibilishment outertimed in districts for recentlement work, and of the parament to village officers on accessed of arecars of the Royal bases left uniques

19-5. CECES or Law.—The increase under this head is due to the creating and continuance of temperary courts to cope with increase of work, and to larger expenditure under Creminal Courts corresponding to the enhanced sharper under the mitor head 3-3. Land Beresci—Crastes or flueracy Americansacture.

19-R. Janu.—Dietary charges have exceeded the hudget anticipation owing to a larger price population and to a rise in the proce of host-staffs. 20 Narra.—The estimated expediture on account of the police recognization.

athenes has not been fully worked up to.
41. Mirror Works and National Comm.—The presence of water in backs bee related expendition.

45. Civil Works—Crem.—The Corporation of Madras are mable to utilize more than 3 out of a grant to them of 6 entered in the budget for water-supply and drainage works.
55. Civil Works—Prince Works Department,—The degrees occurs apoly.

in the travellion under "Stock and suspense" due to the fact that payment will not be reade within the year on account of stores budgeted for.

 The following statement shows the Provinceal expenditure under the several major beads on account of grain compensation allowance :—

14. The following councils explain the principal differences in the allottracets for the imper beads to thus arrived at as between Budget and Beetsed:—

• Lean Director — de altering statel, a 'may precision of 1 still has been calculated for constraints with the element of the constitution of a children director, the remember of the constitution of a children director, the remember of the Remember of the Remember beauth of the Principal has been redded for imprecing the save of the Remember beauth of the Principal Child in Section of Authority and the services of the Remember of the Remember

Ruge offices.

cortain districts. Under a Lond Eccords and Agriculture," enhanced provision for checking field sketches to made. As weath, lump allot ments have been suftered for the register of village establishments under the miner heads 5-C. Lond Records and Appreciative and S.E. Allowances to District and Village Officers.

7. Excess -The curess of -28 mainly represents the Previncial portion of a weight of a biblishments in accordance with the recommendations of the Excise

11. Found.-The heavy portion of the inscress is on account of enhanced precision under Conservery and Works due to more extensive and intensive denurtureful coemitions. The budget also contains an all street recommended by the Finance Committee of 1, of which the Previousl share is 60, for tree-plasting operis reade for improving the gas and prospects of the Provinceal Forest Service, for sugmenting the exattelling staff and for the receive of the closest staff in Forest

15. Gave our Appropriation.—The additional provision is to meet increased expenditure consequent on the introduction of measures of coestatutional reform and

19-1. Corner of Law. -The hedget contains all strents of 50 for the solution for the constitution of additional districts; 1-60 for additional Session Judges, temporary Sub-Judges, and temporary additional District Municia required to cope with increase of work, and '18 for roleing the minimum pay of clorks in District Manufal Courts to No. 20 per suppose as already carried out to Collectors' and Divisional offices. It slso provides for a fall year's change on account of the seventh Puisce Judge recently appointed to the High Court, and for the revision of the erale of elevent establishments to the High Court. . .

20. Parzen.-The budget for 1910-1913 provides for nearly the full strength. of the Police staff under the reorganisation scheme.

22. Exctation.-The increased provision is autualy on eccount of the appointment of four additional Professors in the Premiency College, of the reorgeniration of training schools for higher elementary teachers, of larger grants in aid, and of a great (50) towards University and Dilleguite education

24. Mixical.—The revised estimate includes a special grant from Provincial funds of 1-50 to local bodies for purposes of againstian, suggesterentian the annual grant of \$30 made by the Gavernment of lucia for that purpose. The budget for cent year provides for a special supplementary great of \$75 from Provincial. It also includes Jump allotusents of (a) -15 for improving the pay and prespects of Civil Horpital Assistants and (8) '25 for the appointment of two additional Deputy Sanitary

the purtiase of a larger quantity of emphasis bank for reserve stock during that next near as the price in the Amsterdam market is new facuseable. Provision is also made. for larger expenditure on the development of industries and industrial education. It of (a) 10 for an exhibition of oil-extracting piegt with reference to a resolution of the Octavernum Industrial Conference and (5) 45 as a great to the Victoria Technical Invitute for the development of certain perfected industries of Southern India.

29. Superantor Autowastes and Peopless.-The increase is in quotequence of the zurnal anaual expansion of the presion list.

45. Crert Woman-Cress.—The budget continue alletments of (a) 7 for great 10 the Madria Corporation for water-supply and drainage works; (2) 5 for grant to the Modras Port Trust towards herbour development; (e) 75 for contribution to local.

bodies for the construction of bospitals and dispersuates; and (d) 14-70, against 14-22 in the revised, as special grants to district bearly. These allotypents have been based on the recommondations of the Finance Committee.

45. Cruz. Webris-Prince Weezs Disturrance.—The budget includes larges
